🔍 Abstract: The present invention discloses to the chlorogenic acid and isochlorogenic acid obtained by extracting natural plate. The pharmacologic tests show that it has obvious activity for resisting SARS virus. Said invention utilizes the chlorogenic acid and isochlorogenic acid with said activity and vitamin C as main active component, and adds excipient, auxiliary agent or carrier according to different requirements to make them into composite with different dosage forms. They can be used in the medicine for curing and preventing diseases due to SARS virus.
